

SIDAK SINGH CHAHAL

Education

📞 9045148408 ✉️ [in](#) [gh](#)

Indraprastha Institute of Information Technology, Delhi (IIIT-D)

Oct 2022 – June 2026

B.Tech in Electronics and Communication Engineering (ECE)

CGPA: **8.00**

Dhruva Public School

2021 – 2022

Class 12th

Percentage: **93.6%**

Jaycees Public School

2019 – 2020

Class 10th

Percentage: **97.4%**

Experience

AI Quality Assurance Engineer

Feb 2026 – Present

Outlier.ai

- Benchmarked and corrected over **100+ distinct model trajectories** totaling **135+ hours**, providing the foundational human-preference data required for iterative fine-tuning, improving **response quality** consistency.
- Designed **prompt-based test cases** to probe reasoning failures; scored and ranked model outputs against rubric criteria and fine-tuning pipelines by delivering **120+ high-fidelity preference data points**.

Software Engineer Intern

Jan 2025 – Apr 2025

Techcarrot.ae

- Engineered a full-stack Employee Management System (**ReactJS, Spring Boot, MySQL**) with **15+** reusable UI components, automating HR workflows for **200+** employees.
- Designed and integrated **REST APIs**, role-based access control and database workflows, improving attendance accuracy on enterprise system (**from 78% to 96%**) and cutting report generation time by **80%**.

Undergraduate Researcher

Aug 2024 – Dec 2024

MIDAS Lab, IIIT-D

- Built evaluation pipelines for open-source **LLMs** (**LLaMA-405B, Mixtral**) using advanced prompting, improving mathematical reasoning accuracy by **6%** on **MATH** and **MMLU** datasets.
- Implemented a **Retrieval-Augmented Generation (RAG)** system via LlamaIndex enabling context-aware reasoning, boosting hard-question accuracy by **12%**.

Projects

IIIT Delhi Infirmary Portal (Deployed on College server) | *Next.js* [🔗 GitHub](#) | [Live](#) Jan 2026 – April 2026

- Crafted an infirmary management system serving **2,000+** users with secure RBAC, live appointment scheduling, and digital prescriptions through **40+** APIs.
- Achieved sub-**2 sec** load times and **92%** code reusability using modular architecture and **47+** UI components, with optimized queries and caching reducing booking and retrieval latency.

LiverGuard Disease Predictor | *Python, Machine Learning* [🔗 GitHub](#)

Aug 2024 – Nov 2024

- Developed a liver disease prediction model using **30,000+** clinical records with EDA, feature engineering, and class balancing, achieving **99.8%** accuracy with XGBoost — a **2.5×** improvement over baseline.
- Benchmarked **6+** classifiers and improved interpretability via feature-importance and correlation visualization for actionable clinical insight.

SheStarts—AI-Powered Career Counselor | *Next.js, Gemini 2.5 Flash* [🔗 GitHub](#) | [Live](#) June 2026 – June 2026

- Designed and deployed an **AI-powered** career-counseling platform for women re-entering the workforce, featuring a conversational AI counselor, employability scoring, and career roadmaps for **500+** users across **12+** career domains.
- Developed a **3-layer AI engine** with real-time streaming, personalized guidance, and fallback logic, reducing career decision time by **60%** while maintaining **100% response availability** across **7 dashboard modules**.

Technical Skills

Languages: Python, SQL, MySQL, Java, C++, JavaScript

Expertise : DSA, DBMS, Agile Development, OOPS, Operating Systems, Computer Networks, Machine Learning

Frameworks & Technology : React.Js, Next.js, Prisma, RAG Pipelines, JWT Authentication, FAST APIs

Libraries & Tools: Pandas, NumPy, Matplotlib, Postman, Git, GitHub, Google Colab

Positions of Responsibility & Achievements

- Amongst the top **5 scorers** in branch, IIIT Delhi AY 2024 – AY 2025
- Top 3 percentile in JEE Mains; qualified JEE Advanced 2022
- Won **Best Entrepreneurial Idea** for PlantFocus, a focus-to-earn platform promoting productivity and tree plantation. Aug 2025 – Dec 2025
- Solved **400+** DSA problems on [LeetCode](#), GeeksforGeeks, and HackerRank
